

DISTILLERY RESERVE HEBRIDEAN WHISKY FESTIVAL RYE CASK FINISH

PRODUCT INFORMATION

The latest addition to the Torabhaig Distillery Reserve collection is here.

Our latest Distillery Reserve release represents another exciting chapter in Torabhaig's journey of whisky exploration. This is our first-ever Rye Cask Finish expression, offering a unique glimpse into the world of The Reivers Distillery, our sister distillery located in the Scottish Lowlands.

This single malt whisky was distilled in January 2019, aged in first-fill and refill Bourbon barrels, and finished in Rye Whisky Casks from The Reivers Distillery. Bottled at batch strength it showcases the complexity of Torabhaig's elegantly rugged peat style, complemented by the spicy character of the Rye Casks.

Crafted using Concerto malted barley, with an in-grain phenol level of 80PPM, and fermented with Pinnacle MG+ yeast, this release is bottled without chill filtration or colouring, preserving its natural depth and character. The residual phenols level of 33.4PPM sits in perfect harmony with the elegant complexities of this whisky.

Product	Single Malt Scotch Whisky
Bottling strength	61.6%
Wood	Ex-Bourbon, Finished in Rye Whisky Casks from The Reivers Distillery
Peat in grain	80 PPM
Residual peat	33.4 PPM
No. of bottles	980
Non chill-filtered, not coloured	

TASTING NOTES FROM OUR WHISKY MAKER & MASTER BLENDER

NOSE: The immediate note is a strong freshly lit bonfire smoke followed by a heavy pepper/rye warmth spice. There is toffee apple sticky sweetness layered with sweet caramel. There are undertones of citrus sweetness, salty sea air and a grassy/fresh hay notes.

PALATE: There is a heavy cereal note behind the slightly softened peat warmth with earthy characteristics. A candied sweetness comes through with a subtle hint of vanilla and butterscotch. There are hints of menthol spice which is predominant at the front of the mouth.

FINISH: The finish is sweet almond/marzipan with a pleasant peat smoke spice. The finish lingers more at the front of the mouth which is unusual compared to the traditional Torabhaig which tends to be dominant at the back.
